The ddns-updates-style parameter controls whether or not the server will
attempt to do a DNS update when a lease is confirmed. We default to the
behavior of the version 2 packages ('none', since DHCP v2 didn't
have support for DDNS.)
ddns-update-style none;
If this DHCP server is the official DHCP server for the local

Use this to send dhcp log messages to a different log file (you also
have to hack syslog.conf to complete the redirection).
